

**Risk Disclosure
For
Contracts for Differences**

14th March 2008 v2

The brand name "FxPro" and the domain name "www.FxPro.com" are owned by EuroOrient Securities and Financial Services Ltd (www.EuroOrient.eu), a financial services company authorized and regulated by the Cyprus Securities and Exchange Commission under the license number 078/07 (www.cysec.gov.cy)

RISK DISCLOSURE FOR CONTRACTS FOR DIFFERENCES

EuroOrient Securities and Financial Services Ltd (hereinafter called the “Company”) is an Investment Firm regulated by the Cyprus Securities and Exchange Commission (license number 078/07). This notice is provided to you in accordance with the Markets in Financial Instrument Directive (MiFID) of the European Union because you are considering dealing with the Company in the financial instrument of Contracts for Difference (CFD).

This notice cannot and does not disclose or explain all of the risks and other significant aspects involved in dealing in Contracts for Differences (CFDs) and was designed to explain in general terms the nature of the risks particular to dealing in the financial instrument of Contracts for Difference (CFD) and to help the Client to take investment decisions on an informed basis. This notice should be read together with the General Risk Disclosure.

In order to comply with the Markets in Financial Instrument Directive (MiFID) of the European Union, the Company will classify the prospective client as Retail Client, Professional Client or Eligible counterparty when considering the application for opening an account, based on the information provided to the Company.

Prior to applying for an account the Client should consider carefully whether trading in the financial instruments of Contracts for Difference (CFDs) is suitable for him in the light of his circumstances and financial resources. Trading in the financial instruments of Contracts for Difference (CFDs) entails the use of “gearing” or “leverage”. In considering whether to engage in this form of trading, the Client should be aware of the following:

Risks associated with transactions in CFDs

The Client should unreservedly acknowledge and accept that, regardless of any information which may be offered by the Company, the value of the Contracts for Difference may fluctuate downwards or upwards and it is even probable that the investment may become of no value.

The Client should unreservedly acknowledge and accept that he runs a great risk of incurring losses and damages as a result of the dealing in Contracts for Difference and accepts and declares that he is willing to undertake this risk.

For many members of the public dealings in Contracts for Difference will not be suitable. The Client should not engage in any dealings directly or indirectly in Contracts for Difference unless he knows and understands the features risks involved in them.

The Client should take the risk that his trades in Contracts for Difference may be or become subject to tax and/or any other duty for example because of changes in legislation or his personal circumstances. The Company does not warrant that no tax and/or any other stamp duty will be payable. The Client should be responsible for any taxes and/or any other duty which may accrue in respect of his trades.

The high degree of “gearing” or “leverage” is a particular feature of the Contracts for Difference. This stems from the margining system applicable to such trades, which generally involves a comparatively modest deposit or margin in terms of the overall contract value, so that a relatively small movement in the underlying market can have a disproportionately dramatic effect on the Client’s trade. The Contracts for Difference available for trading with the Company are non delivery spot transactions giving an opportunity to make profit on changes in currency rates, commodity, stock market indices or

share prices called the underlying instrument. If the underlying instrument movement is in the Client's favour, the client may achieve a good profit, but an equally small adverse market movement can not only quickly result in the loss of the Clients' entire deposit but also any additional commissions and other expenses incurred.

Volatility of price and limitation on the available market

Contracts for Differences (CFDs) are derivative securities, where their price is derived from the price of the underlying reference instruments in which the CFDs refer to. Derivative securities / markets can be highly volatile. The prices of CFDs and the Underlying Reference Instruments and Indices may fluctuate rapidly and over wide ranges and may reflect unforeseeable events or changes in conditions, none of which can be controlled by the Client or the Company. Under certain market conditions it can be impossible to execute any type of Clients order at declared price. Therefore Stop Loss order can not guarantee the limit of loss.

The prices of CFDs will be influenced by, amongst other things, changing supply and demand relationships, governmental, agricultural, commercial and trade programs and policies, national and international political and economic events and the prevailing psychological characteristics of the relevant marketplace.

Transactions in CFDs are not undertaken on a recognised exchange, rather they are undertaken through the Company's Trading Platform and, accordingly, they may expose the Client to greater risks than regulated exchange transactions. The terms and conditions and trading rules are established solely by the counterparty which in this case is the Company. The Client is obliged to close an open position of any given CFD during the opening hours of the Company's Trading Platform. The Client also has to close any position with the same counterparty with whom it was originally entered into, thus the Company.

Other additional obligation

Before the Client begins to trade, he should obtain details of all commissions and other charges for which the Client will be liable. If any charges are not expressed in money terms (but for example as a dealing spread), the Client should obtain a clear written explanation, including appropriate examples, to establish what such charges are likely to mean in specific money terms.

The value of open positions in CFDs is subject to financing fees. The price of long positions in CFDs is reduced by a daily financing fee throughout the life of the contract. Conversely, the price of short positions in CFDs is increased by a daily financing fee throughout its life. Financing fees are based on prevailing market interest rates, which may vary over time. Details of daily financing fees applied are available on the Company's website.

Margin requirements

Clients are required to deposit a Margin with the Company in order to open a position. The Margin requirement will depend on the underlying instrument of the CFD, level of leverage chosen and the value of position to be established. The Company will not notify the Client for any Margin Call to sustain a loss making position. The Company has the discretionary right to start closing positions when margin decreases to about 10%, and automatically close all positions at market prices if margin drops below 5%. The company guarantees that there will be no negative balance in the account when trading CFDs.
